

Dr. Ronald S. Slesinski
Consultant

Dr. Ronald Slesinski is a board certified toxicologist with over 30 years of experience in academia, toxicology testing and regulatory affairs. He is a consultant to Spherix providing expert assistance on FDA and EPA toxicology and regulatory issues.

Following postdoctoral research on human cellular genetics at the Massachusetts General/Harvard Medical School, Dr. Slesinski was an Assistant Professor of Cellular and Developmental Biology at Kansas State University. He then began a 13 yr career at the Bushy Run Research Center/Union Carbide Corporation where he was progressively responsible for Genetic, Biochemical and Acute Toxicology testing programs. Subsequently, he worked in the consulting industry, assisting food, chemical and pesticide companies with a wide range of regulatory and scientific issues including pesticide residue and analytical studies, antimicrobial and biopesticide registrations with EPA and preparation of safety profiles for pesticides, food additives and drug products.

As a Senior Toxicology Consultant, Dr. Slesinski had responsibility for assisting companies with EPA TSCA and FIFRA regulatory submissions, liaison with agency staff, performing safety reviews for GRAS petitions/self determinations and overseeing submission of petitions for direct and indirect food contact substances. He has had extensive experience in designing, monitoring and evaluating genetic and general toxicology testing programs and in auditing compliance with TSCA, FIFRA, OECD testing requirements and Good Laboratory Practice standards.
